
Perturbed doravirine poses against the wild-type sampled basin
All starting poses
The convergent region
DOR long-axis tilt from the crystallographic pose (°)
DOR centroid displacement (Å)
DOR centroid displacement (Å)
Wild-type frames (3 × 100 ns, n=795)
Crystallographic pose (4NCG)
Start (label: pose RMSD as generated, Å)
End, inside the basin (RMSD ≤ 1.78 Å)
End, outside
