
A
Y188L causes loss of aromatic packing between the DOR chlorocyanophenyl ring and Tyr188 sidechain
Y188L
WT
DOR chlorocyanophenyl ring burial (RT heavy-atom contacts < 4.0 Å)
Time (ns)
B
V106A causes DOR to slip out of its crystal structure pose
V106A
V106A+F227L
V106A+L234I
V106A+P225H
WT
DOR displacement from the crystallographic pose (minimum distance to Ser105, Å)
Time (ns)
C
G190E expands the DOR binding pocket
G190A
G190E
WT
NNIBP volume (Å³)
Time (ns)
